

## ***PRACTICAL SAILOR ONLINE***

**T**hose looking for a small, affordable daysailer will find some free reviews at [www.practical-sailor.com](http://www.practical-sailor.com), including Carl Alberg's Seasprite (see page 9, this issue), and the Hunter 216. Just click "Sample Boat Reviews," on the left-hand menu. Digging into the "Tools and Techniques" section, also via the left-hand menu, you'll find a host of winter projects, including Tom Wetherbee's improved mount for the Sensibulb LED (Tom's dimmer is on page 15). Also recently posted to "Tools and Techniques," is our last test of vents, a good weapon in the fight against mildew (see page 35).
