

GREEN GAUGES

Green arrows accompany each product category in this report, indicating the products' "green" ranking. The more eco-friendly products are listed at the top, in the darker green part of the arrow, while the less-environmentally friendly products appear in lighter green at the bottom. Keep in mind that so-called "green" products aren't necessarily free of harmful ingredients. The rankings are based on hands-on testing by *Practical Sailor* and manufacturer-supplied data. We welcome reader feedback on these and other eco-friendly maintenance products.
