

## DINGHIES

**1** The bench seat on the Genesis 270 FTD doubles as a storage area with a removable tray and drain holes.

**2** The externally mounted oars can be removed from their oarlocks by squeezing together two tabs.

**3** A gasketed anchor locker is molded into the bow area.

**4** The V-hull cuts through chop well, but adds drag when towing.

**5** The two integrated wheels at the transom allow one person to lug the boat around on shore.
