

INTERIOR NOTES: SHANNON 37/38

Both the Shannon 37 (above) and the Shannon 38 followed two basic interior configurations that could be customized. One layout featured an aft head; the other placed the head forward. Because of the centerboard, water tankage on the Shannon 37 is located beneath the settees port and starboard. On the 38, tankage is beneath the cabin sole in the keel, allowing more room for stowage beneath the settees.
